Core values and mission

We believe the internet has become humanity's most important technology. We build crypto-market protocols, systems, and tools to improve how it works. Today, we are focused on how we store, locate, and move crypto-market information. We listen. We are passionate. We love to the fullest. We welcome change. We value our team. We love to win. We are fans. We are supportive. We are kind. We are positive. We collaborate well with others. We say Thank You.

OTC Application Development

OTC Exchange, Inc. is developing several cryptocurrency projects that focus on the advancement of small global companies and cryptocurrency businesses. We are poised to meet the needs of companies, participants and investors at every level. OTC Exchange, Inc is the "NEW" fresh global face of small companies and crypto businesses.

OTC Open Source

If you are reading this, chances are you are using the fruits of open work done every decade since the 1970s. We have all benefited enormously from Open Source. It's everywhere: from the software we use daily, our OS kernels, our network stacks, and our web browsers; to open work processes like the IETF and W3C working groups; to the libraries we use and the contributions we get. The internet is what it is today thanks in great part to an Open work culture. We are the same: our code and our work is Open Source.

OTC Coindex

OTC Coindex is an premium web application, which allows your visitors to track the latest Crypto trends, view information, live streaming quotes and interactive historical charts and analysis for more than 2,300 cryptocurrencies and monitor all markets streaming in real time.

OTC ICO Unity

Our goal has always been to drive the mainstream adoption of decentralized blockchain technologies. We build crypto-market protocols, systems, and tools to improve how it works. Today, we are focused on the OTC Unity Platform, a decentralized blockchain ICO launching, trading, information and community platform targeted toward entrepreneurs, investors and crypto enthusiast alike. OTC Exchange offers the technology, support, and services to help companies and investors rapidly deploy the right blockchain solution for them. Launch and list your ICO campaigns, create a smart contract, raise funds or contribute to other startups right here on OTC Exchange.

For the entrepreneur

Our decentralized ICO platform enables the release of new compliant offerings to the world without middleman involvement. Furthermore, even entrepreneurs who have previously built other blockchain projects outside our ecosystem can easily feature their coin or token on our decentralized exchange. The only requirement is that the blockchain product have the proper security elements in the core of the blockchain's code.

For the investor

Our decentralized information and exchange platform enables Investors to trade cryptocurrencies without having to pass through a centralized exchange, which can be an arduous and even dangerous process. They also do not have to use an escrow service, voucher, nor even an intermediary coin—not even Bitcoin. Furthermore, there is no registration process required, nor are there any withdrawal limits. We currently feature approximately one thousand blockchain coins for trading, and we are prepared to scale into multi thousands.

For Everyone

Job marketplace for contributors, Every project needs a help in different areas: coding, design, legal support, copywriting, marketing, etc. If you a person with required skills, then you can easily find a job at our marketplace. Help a project and get paid in cryptocurrency.
